

Petrus de Vries

Petrus de Vries is the Sue Struengmann Professor of Child & Adolescent Psychiatry. He trained in Medicine in South Africa before moving to the UK where he completed his clinical training in Psychiatry and Child & Adolescent Psychiatry, and a PhD in Developmental Neuropsychiatry at the University of Cambridge. He has research interest in autism spectrum disorder, adolescent health promotion, and the neuropsychiatry of rare diseases.

Prof de Vries is chairman of the Society for the Study of Behavioural Phenotypes (SSBP), an international, interdisciplinary research organization for rare diseases, and has a longstanding programme of research in the neuropsychiatry of tuberous sclerosis complex (TSC), a rare disease associated with high rates of neurodevelopmental and mental health problems. He is a Medical Advisor to Tuberous Sclerosis Parent Organizations in the UK, USA, Germany and Netherlands. He was chairman of the Neuropsychiatry Panel of the international consensus group that revised the diagnostic criteria and treatment guidelines for TSC in 2012, and has been on the study steering committee of three phase III clinical trials for mTOR inhibitors in TSC. He is also a member of the working committee of the TOSCA international natural history database project of TSC.
